EDUCATION

De La Salle University – Dasmariñas *2022 – 2026*

Bachelor of Science in Information Technology | Web Development Specialization

- **GPA:** 3.70 / 4.00
- **Honors:** Consistent Dean's Lister — 1st Honor's List, AY 2022–2025 (All Semesters)

Lyceum of the Philippines University - Cavite Campus International High School *2021 – 2022*

Bachelor of Science in Electronics and Communications Engineering

Lyceum of the Philippines University - Cavite Campus International High School *2018 – 2020*

STEM Strand | Grade: 97 | Highest Honors (AY 2021–22)

PROFESSIONAL EXPERIENCE

Software Quality Assurance Analyst Intern *Jan 2026 – May 2026*

Global Dominion Financing Inc.

- **Quality Assurance & Requirements Validation:** Reviewed Business Requirement Documents (BRDs) and participated in User Acceptance Testing (UAT) to validate system enhancements, vendor deliverables, and business requirements before production deployment.
- **System Testing & Defect Identification:** Executed system validation activities for Loan Origination Systems (LOS) and Loan Management Systems (LMS), identified defects, documented reproduction steps, and assisted in verifying fixes.3
- **Defect Reporting & Retesting:** Reported defects discovered during UAT and system validation, coordinated with relevant teams on issue resolution, and verified fixes before production deployment.5
- **Test Validation & Release Readiness:** Assisted in validating system enhancements and vendor deliverables to ensure compliance with business requirements before release.
- **Process Improvement & Technical Analysis:** Researched technology solutions and process optimization strategies to improve business workflows and support continuous system enhancements.
- **Application Development & Automation:** Developed and deployed an internal ticketing system using Microsoft Power Apps to streamline issue tracking, support requests, and operational workflows.
- **System Monitoring & IT Operations:** Supported and monitored Loan Origination Systems (LOS) and Loan Management Systems (LMS), assisting in maintaining system availability and resolving production-related issues.

KEY SKILLS

- **Programming Languages** - JavaScript, TypeScript, Dart, Java, Python (basic), C#
- **Frameworks & Technologies -** Flutter, React, ASP.NET, Firebase (Firestore & Auth), Vite, Tailwind CSS, Bootstrap, Firebase Firestore, MySQL, SQL Server, MongoDB (basic)
- **Other Tools & Platforms -** Git, GitHub, GitHub Actions, Android Studio, Visual Studio Code, Figma, Vercel, Netlify
- **QA Tool** - Playwright, Postman, Jira, Zephyr, Apache JMeter, Swagger/OpenAPI, TestRail
- **Testing Skills** - Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, API Testing, UI Testing, Cross-Browser Testing, Exploratory Testing, User Acceptance Testing (UAT), Test Case Design, Test Scenario Design, Test Data Preparation, Defect Tracking, Bug Reporting, Requirements Analysis, Agile Scrum, SDLC, STLC

CERTIFICATIONS

- **Foundational C# with Microsoft –** FreeCodeCamp
- **Excellence in Leadership –** DLSU–D
- **The Complete 2026 Software Testing Bootcamp** – Tarek Roshdy (Udemy)
- **Endpoint Security, Cyber Threat Management, Introduction to Cybersecurity –** Cisco Networking Academy
- **Software QA Manual Testing: A Hands-on Training Using Jira, Testrail & Excel –** MST CONNECT Educational Consultancy

PROJECTS

M.I.L.O - Monetary Intelligence Ledger Organizer *2025 – 2026*

Tools & Technologies: Flutter & Dart · Firebase Firestore · OCR Scanner · AI Chatbot Integration · GitHub

Best Thesis – College of Science and Computer Studies, DLSU–D (2026)

3rd Place – Institutional Oral Presentation, DLSU–D (2026)

- **Application Development & Cloud Integration**: Developed and deployed a full-featured budgeting application with a cloud-based backend, enabling secure data storage and seamless application functionality.
- **Version Control & Collaborative Development**: Managed source code, version control, and collaborative development workflows using GitHub to support efficient team coordination and code integration.
- **Feature Implementation & Quality Assurance**: Implemented, tested, and validated application features to ensure functionality, reliability, and optimal application performance.
- **System Validation & Functional Testing**: Conducted end-to-end functional testing of the M.I.L.O. application, verifying expense tracking, budgeting, OCR receipt scanning, AI chatbot interactions, user authentication, and financial reporting features. Identified and documented defects, validated fixes, and ensured all core functionalities met business and user requirements prior to deployment.

Automation Testing for OpsTicket Ticketing System *2026*

Tools & Technologies: Playwright, TypeScript/JavaScript, Node.js, Git, Jira, Linux, ChatGPT

- **Test Automation Development:** Developed automated end-to-end test scripts using Playwright to validate core application workflows and improve testing efficiency.
- **Functional & Workflow Testing:** Automated login, ticket creation, ticket assignment, and ticket management scenarios to verify critical business processes.
- **Test Framework Architecture:** Implemented reusable Page Object Model (POM) components to improve test maintainability, scalability, and code reusability.
- **Regression & Smoke Testing:** Executed smoke, functional, and regression test suites to validate application stability and ensure new changes did not impact existing functionality.
- **Defect Reporting & Validation:** Identified, documented, and tracked application defects, collaborated on issue resolution, and verified fixes through regression testing.
- **Cross-Browser Testing & Test Analysis:** Performed cross-browser compatibility testing, analyzed test execution results, and reported testing outcomes to support software quality.
- **Version Control & Test Maintenance:** Maintained and updated automated test scripts using Git, supporting collaborative development and continuous improvement of the test automation framework.

Software Testing Documentation and Workflow Management Environment *2026*

Tools & Technologies: Jira

- **Test Documentation & Design:** Created comprehensive testing artifacts, including test plans, test cases, test scenarios, test data, and bug reports to support structured software testing.
- **Testing Process & Workflow Management:** Established organized testing workflows for functional, regression, smoke, and User Acceptance Testing (UAT) activities to improve test execution and traceability.
- **Defect Tracking & Progress Monitoring:** Tracked testing progress, managed defect lifecycles, and monitored issue resolution using Jira to ensure timely validation and project transparency.

CORE COMPETENCIES

Software Quality Assurance • Manual Testing • Test Case & Test Scenario Design • Test Planning • Test Data Preparation • Functional Testing • Regression Testing • Smoke Testing • Sanity Testing • API Testing • UI Testing • Cross-Browser Testing • Exploratory Testing • User Acceptance Testing (UAT) • Test Automation (Playwright) • Defect Reporting & Tracking • Bug Lifecycle Management • Requirements Analysis (BRD) • SDLC • STLC • Agile Scrum • Production Support • Software Deployment • Version Control (Git & GitHub) • Technical Documentation • Root Cause Analysis • Stakeholder Communication • Cross-Functional Collaboration
